On Cost – On Time ®

Quality Assurance

Aviation Procurement Systems is dedicated to satisfying our customers' requirements for pricing, quality and timely deliveries.

- Control of all licensable materials and technical data
- Customer and vendor screening
- Export licensing with US State and Commerce Departments
- AES filing
- Shipping documentation preparation

FAA 8130-3 form or OEM Certification of Conformance follows every shipment.

Export Compliance

We have extensive experience supplying international clients, ensuring that materials and technical data are always controlled and shipped in accordance with the International Traffic in Arms Regulations, the Arms Export Control and all US Government requirements.

Aviation Procurement Systems obtains the necessary export licenses for all international shipments and works closely with each country's Freight Forwarder to ensure each shipment is handled properly.

Spares

Aviation Procurement Systems is committed to providing the highest quality materials for the best value in the market.

We offer the most competitive solutions and meet customers' needs.

We locate hard to find items, providing our customers the solution.

Repairs

All repairs are performed, tested and certified to OEM standards of quality and all components used in the repair are OEM quality components.
